

PYROSPOT DSRF 11N

Ratio pyrometers with fibre cable for industrial application

Overview

Digital ratio pyrometers with RS-485 interface

Features

- For temperature measurements between 600 °C and 3000 °C
- Short response times from 5 ms
- Vario optics with measurement field diameters from 0.7 mm
- RS-485 interface
- Display and keyboard
- Applicable up to 250 °C ambient temperature

Description and applications

The digital ratio pyrometers PYROSPOT DSRF 11N are specifically designed for industrial temperature measurement from 600 °C. They utilize the 2-colour system which has the advantage of measurement widely independent from the emissivity.

The solid body with fibre optics cable allows usage even under rough environmental conditions. The bright temperature display is visible even over long distance.

With a fast response time of only 5 ms (t_{95}) these pyrometers are also suitable for fast measurement processes. The vario optics for fibre optical head realizes spot sizes from 0.7 mm diameter.

The integrated laser aiming light enables to focus the measuring object exactly. The temperature linear standard output signal of 0/4 to 20 mA allows easy implementation in existing measurement and control systems.

The device is equipped with a galvanically isolated RS-485 interface, which allows parameterizing and software evaluation even in bus systems.

All parameters are adjustable via push-buttons and display directly on the device. Also by using the convenient parameterizing and evaluation software PYROSOFT Spot the parameters can be easily adjusted to the application.

Typical application areas:

- Steel industry
- Kiln engineering
- Soldering installations
- Ceramic industry
- Metal industry

Technical data				
Type (Order number)	DSRF 11N (5112010202)	DSRF 11N (5112010203)	DSRF 11N (5112010204)	DSRF 11N (5112010205)
Temperature range	600 °C to 1400 °C	700 °C to 1800 °C	800 °C to 2500 °C	900 °C to 3000 °C
Sub temperature range of analog output	adjustable within temperature range, minimum span 50 °C			
Spectral range	0.7 µm to 1.1 µm			
Optics	vario optics ROH I-100, ROH II-65, ROH II-250			
Distance ratio	see table			
Measurement uncertainty ¹	0.5 % of measured value in °C + 1 K			
Reproducibility ¹	0.1 % of measured value in °C + 0.5 K			
Transmittance	50 % to 100 %			
NETD ^{1,2}	0.1 K			
Response time (t ₉₅)	5 ms ³ , adjustable up to 100 s			
Ratio correction K	0.800 to 1.200			
Emissivity	0.050 to 1.000 (1-channel mode)			
Storage	minimum and maximum value storage			
Output	0/4 to 20 mA, switchable, temperaturlinear, max. burden: 500 Ω (galvanically isolated)			
Interface	RS-485 (galvanically isolated), half duplex, max. baudrate 115 kBd, Modbus RTU			
Aiming	laser aiming light, 630 nm to 680 nm, class II, < 1 mW			
Switching output/thresholds	1 solid state relay, R _{load} min. 48 Ω/adjustable within temperature range			
Software	PYROSOFT Spot for Windows®, optional: PYROSOFT Spot Pro			
Parameters ⁴	ratio correction, emissivity, transmissivity, response time, temperature unit °C or °F, storage, settings, sub temperature range of output, switching thresholds of switching output			
User controls	display and keyboard for parameter setting			
Power supply	24 V DC ± 25 %, residual ripple 500 mV			
Power consumption	max. 1.5 W (without load on switching output)			
Operating temperature	0 °C to 45 °C (electronics), 0 °C to 250 °C (optical head), 0 °C to 250 °C (fibre cable), 0 °C to 150 °C (fibre cable with 90° curve)			
Storage temperature	-20 °C to 70 °C			
Weight	appr. 600 g (without fibre cable and optical head)			
Dimensions	appr. 110 mm × 80 mm × 40 mm			
Housing	alu housing with plug connector, display and keyboard			
Safety class	IP 65 (DIN 40 050)			
CE symbol	according to EU regulations (EN 55 011)			
Scope of delivery	PYROSPOT DSRF 11N, manual, inspection sheet, PYROSOFT Spot for Windows® (without connection cable, fibre cable and optical head, please order separately)			

¹ T_{ambient} = 23 °C, ε = 1, t₉₅ = 1 s. ² Noise equivalent temperature difference. ³ With dynamic adaptation at low signal level. ⁴ Adjustable via interface and software or directly at the device.
